25X1

1. The attached sketch shows the location of the Petrila works which is engaged in the production of chemicals from raw coal. Benzol, benzene, toluene, carbolic acid, phenol, napthalene and other chemicals compounded are produced here.
2. The coal used as raw material by the Petrila works is extracted from the Petrosani mines. The coal is transported to the Petrila works by a funicular which has a branch leading to Aninoasa village, where smaller coal mines are located. Coal from the Petrosani mines to Petrila is also transported by an underground narrow gauge track railway installation.
